

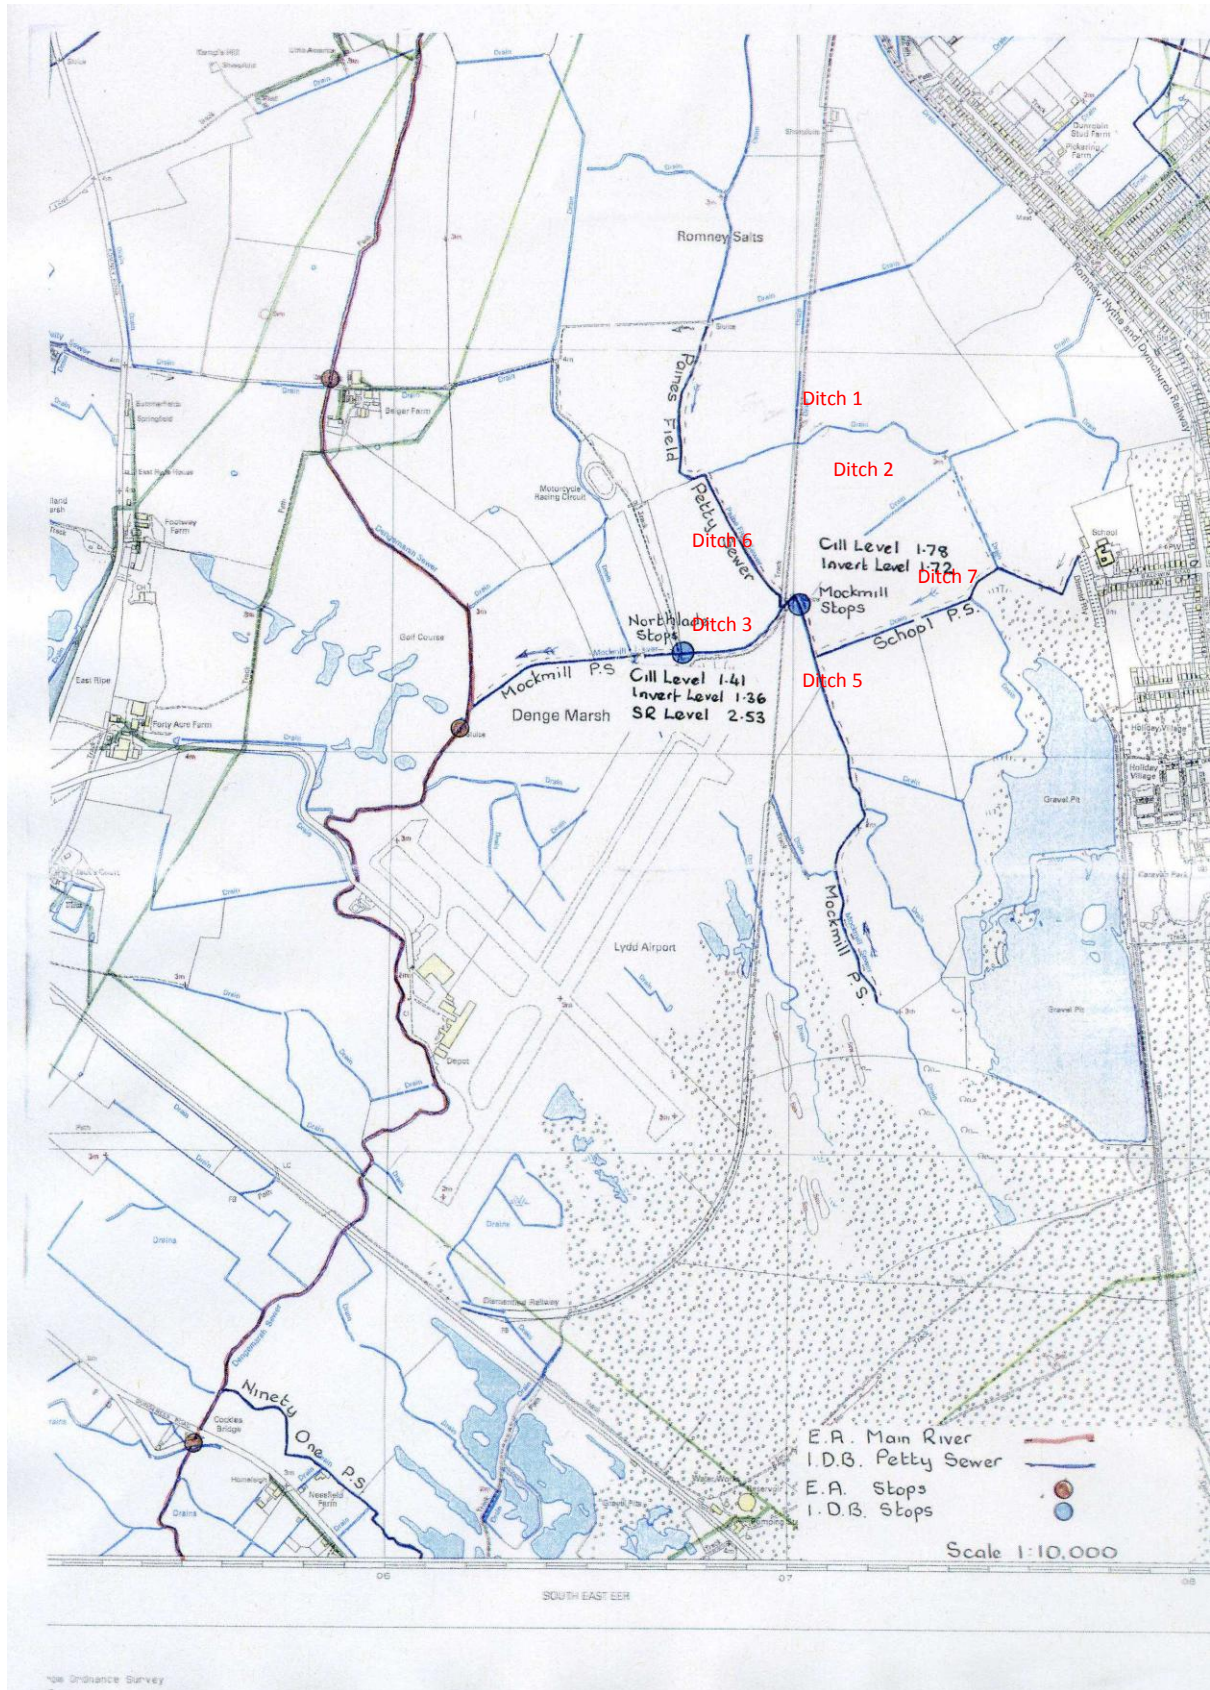

Figure 1 'Context of application Ditches'

Note: Ditch numbering follows that described by applicant's invertebrate survey (CD1.33a). Other information is from the applicant's water drainage strategy (CD1.42a). There is some uncertainty over ditch numbering as the applicant's invertebrate survey did not provide map and locations and have been inferred from the grid references provides, some of which were missing a digit. Ditch 4 is somewhere by the Mockmill Stops, though hard to resolve at this scale.
