Estelle

Thanks for your e-mail. Unfortunately not every salient point was put to members (I don't recall our point on consultation position for the revised AA being mentioned). I appreciate your involvement nevertheless.

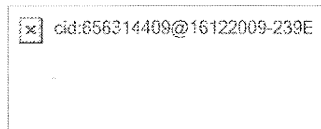

To assist Natural England at this stage, could you please send me as soon as possible the details of the resolution, which I understand was to resolve to grant subject to s106, conditions and reference to GOSE and Natural England (with s28 WCA 81 being relevant on the reference to us with 21 day embargo on giving planning permission.)

Can you also let me have details of recording of the proceedings. Please call if you want to speak -- number below.

With many thanks

Regards

Josh Nelson

Dear Josh

I have spoken to Chris Lewis, our head of Devt Control, who earlier today discussed this letter with Terry. We have made clear to the applicant and others involved that we will not be circulating further papers on the night over and above the reports already circulated. Therefore Terry Ellames, in consultation with Chris and Bureau Veritas, has decided that he will state during his presentation that your letter has been received today, and the representative from Bureau Veritas, who will speak after Terry, will represent the salient points from your letter.

Regards

Estelle Culligan

Importance: High

Estelle

I apologise for the necessity to contact you so urgently. Further to our conversation yesterday and my e-mail of 14:19 today with its attachments, copied to you and forwarded again with this e-mail, Terry Ellames has told me that the intention is that letter and plan will not be distributed to members. This is apparently on the basis that this would mean other correspondence would also have to be put before members.

Considering the contents of the letter, and the fact that it is being sent on an urgent basis from the appropriate statutory nature conservation body under the Habitats Regulations in response to important procedural matters and pursuant to late submitted material from the applicant, we would ask that our letter and the plan are made available as originally requested.

I presume that you will be attending and therefore request that you can please ensure that members are fully aware of the legal position and in receipt of all material facts raised in our correspondence of today prior to coming to their decisions.
